

# Polytec EP 601-T-frozen

## Properties

Polytec EP 601-T-frozen is a non-flowing, thixotropic, single-component, pre-mixed frozen epoxy adhesive.

Polytec EP 601-T-frozen is designed for applications in optics, fiber optics, optoelectronics, medical and semiconductor technology.

Polytec EP 601-T-frozen has an excellent adhesion to glass, PMMA, quartz, silicon, ceramic, metals, FR 4, wood and most plastics.

The material can be applied via dispensing, jet-dispensing and manual application.

## Processing

- The cooling during transport is assured by dry ice (-78 °C) and a temperature indicator.
- Use insulated gloves when touching any component of the packaging.
- The storage temperature of frozen adhesives should not exceed -40 °C.
- The cartridges should be opened only when they have been brought to room temperature (thawing curve see page 3).
- Store cartridges in vertical position while thawing (top down).
- Do not accelerate the thawing by hand heat or warm water (risk of air inclusions)
- Please remove condensed water before opening.
- Surfaces should be clean, thus free of dirt, grease, oil, dust or process chemicals.
- Please notice respective minimum curing temperature and time.
- For Safety information please refer to the respective Material Safety Data Sheet.

The above listed information are typical data based on tests and are believed to be accurate. Polytec PT makes no warranties (expressed or implied) as to their accuracy. The above listed data do not constitute specifications. The processing (in particular the cure conditions) of the material, the process control and the variety of different applications at various customers are not under Polytec PT's control. Therefore Polytec PT will not be liable for concrete results in any specific application or in any connection with the use of this product. In particular the cure conditions do have a major effect on the properties of the cured material. Therefore it is highly recommended to keep the cure schedule – once established – under tight control. With the release of this data sheet all former data sheets will be null and void.
